

H.D.C

Technical Data Sheet

Product Description

A heavy duty super-alkaline detergent designed to remove heavy build-up of soiling, grease & grime. **H.D.C** is an industrial strength dilutable cleaner with outstanding cleaning properties. Ideal for tired looking floors, walls and grout joints that have become dirty over time.

Features & Benefits

- Highly concentrated formula provides superior cleaning power
- Breaks down hard to remove grease and grime
- Specialty product designed for the stone and tile industry.
- Easy to use
- Contains no acids

Where to use

- All natural stone can be cleaned with **H.D.C** (avoid use on polished limestone or marble)
- Ceramic & Porcelain Tiles
- Grout joints
- Concrete & Clay Pavers

Method of Application

1. Mix **H.D.C** with clean water to the desired strength (see back of bottle for recommended dilution rates)
2. Allow the solution to sit/dwell for 3-5 minutes keeping the surface wet with the cleaner. Add more if you see it drying on the surface.
3. After 3-5 minutes have passed and allowed the **H.D.C** to loosen the grease and grime, begin scrubbing with the appropriate grade nylon scouring pad.
4. Remove the dirty water with a dense mop. (Using a wet/dry vacuum is the ideal way).
5. Follow with a rinse of **Spirit Neutral Cleaner** at 20 parts clean water to 1 part **H.D.C**.

Please note: Regular cleaning of sealed surfaces with **H.D.C** is not recommended as the high-alkaline formula will prematurely break down the sealer and affect the performance.

For regular cleaning we recommend **Spirit Neutral Cleaner**.

Available Sizes

1ltr, 4ltr, 20ltr Drums

CLEANER & SEALERS FOR THE TILING INDUSTRY
